

Save Earth - Promote Organic Farming

Improves soil structure and texture
Provides essential plant nutrients
Helps growth and penetration

AGRIGOLD FERTILIZERS

GUARANTEE OF HIGH QUALITY STANDARD PRODUCTS

Range of Products

*ORGANIC MANURES

*NEEM PRODUCTS

*BIO-FERTILIZERS

Liquids & Solids

(Azotobacter, Rhizobium, Azospirillum, PSB.)

*BIO-PESTICIDES

Trichoderma Viridae

Pseudomonas Florescens

*PLANT GROWTH PROMOTERS

*MICRO NUTRIENTS

Straight & All States Formulaes

*WATER SOLUBLE FERTILIZERS

*AGRIGOLD SPRAYERS

ISO 9001:2000 CERTIFIED COMPANY

Manufactured, Imported & Marketed By:

AGRIGOLD ORGANICS PVT. LTD.,

Nature: God's boon to mankind:

In modern agriculture for high yield, besides fertilizers, crop protecting chemicals has become a compulsory ingredient, but when indiscriminately used, land gets polluted leading to infertility and it becomes very difficult for the plants to derive nutritious food. **Why wasteful expenditure?** Chemical fertilizer pollutions: Plants derive their nutrients from the soil. Some part of it is wasted in air and water. As a result of this soil losses its fertility gradually. Indian Institute of Toxicology, Lucknow in its studies observed that every Indian consumes a daily quota of 0.2664 mg, insecticides in his foods in the form of fertilizers/insecticide residues. The scientists of this institute conducted studies on samples of fruits, vegetables, milk and milk products, in which they found over 30% of insecticide residues. Having found their entry into our body through food these residues in our blood and liver cause cancer, skin diseases, ailments of g.d tract and allergies. Frequent illness or disorders is the result of these residues in our body. Farmers indiscriminately use these insecticides, which kill the useful bacteria and other living organisms. Insecticides, fungicides and other chemicals which do not quickly decompose in atmosphere remain in the soil and enter our body through food and water as residues. Environmental scientists are greatly worried about the lead contamination in our water resources leading to the large scale death of organisms & aquatic life. One example: Farmers spray various chemicals to combat the diseases that attack capsicum crop. These chemicals cannot be washed off from the fruits since the fruits will be damaged, if washed. So they enter our body when we use the fruits in the food preparation, such as pickles, curries etc. Now the question arises- aren't we eating poisoned food? Is mother's milk contaminated?

Surprisingly, yes recently, in the developed countries scientists identified few dangerous heavy metals such as arsenic, mercury in mothers' milk, which is considered to be the purest hitherto. Indiscriminately used chemical fertilizers, insecticides remain as toxic elements, which become residues on the crops. When taken inside they poisonate blood. We have to save trees, which provide oxygen for all the living organisms. We have to protect our fertile lands and get toxic free vegetables a fruit, flowers and food grains which is possible only through Organic Farming. Agrigold Organics Pvt limited provides the farmers with natural organic bio-fertilizers with various micro- nutrients insecticides.

AGRIGOLD HOLY COW DUNG:

A Divine sacred 'Havana dravayam' which is blessed by the Almighty and is a divine boon to be used in holy yagnas, during rituals as well as a manure for holy plant SRI TULASI. It is used in the residential premises & business houses where Maha-lakshmi the Goddess of wealth, wishes to stay. It is also mostly used by people to sprinkle Agrigold holy cow dung water and embellish with colourful designs on it. Agrigold holy cow dung is treated cow dung, sanctified by camphor, turmeric and sandal. It comes in handy packages suitable to carry at any place where the religious ceremony is going on.

Available packing: 250 gm Box, 300 gm Pouch

AGRIGOLD MANISHA:

Agrigold Manisha especially designed organic manure to provide the land rich with organic matter. It contains humus based organic materials to protect the fertility of the land over a long period of time. Agrigold Manisha helps the soil to retain the nutrients & increase the shelf life and soil energy. Agrigold Manisha is designed to be used during the initial puddling, initial plantation period, for nursery crops, plant etc, also for the sterile land to increase the fertility of the soil.

Available packing: 40 kg HDPE.

AGRIGOLD VERMI PLUS:

Agrigold Vermi plus contains soil conditioners for rejuvenating the agricultural fields. It spreads the nutrients evenly in the soil and enriches the soil fertility for increasing the growth and yield for the crop. It also helps in changing the soil texture, which gets spoiled by the continuous use of the chemical fertilizers. Suitable for the liveless and nutrients deficient land and soil.

Available packing: 40 kg HDPE.

AGRIGOLD BIO SHAKTHI:

Agrigold Bioshakthi are nature's friendly fertilizers used for improving the soil structure, aeration and tilth, nutrient transportation capacity of the soil, promoting root growth etc. These products mainly enhance nitrogen fixation, phosphate solubility and bio availability of nutrients and are favorable to micro organisms, acting as lifeline to them. Suitable for floriculture, all types of fields, plantation crops, horticulture, Cash crops etc.

Available packing: 500 Gms, 1 kg, 40 kg HDPE.

AGRIGOLD BONE PLUS:

Agrigold Bone plus is natural organic manure made from bone meal and other herbal nutrients. It is a natural food which provides the lost life to the soil as well as to plants which are deficient in phosphorous content. Agrigold Bone plus increases the fertility of the soil and yield to double extent. It also avoids quick and early fall of the leaf and crop. It is very much suitable for nitrogen, phosphorous deficient plants and soil with less fertility. It is mainly given during puddling stage of the crop.

Available packing: 40 kg HDPE.

AGRIGOLD NEEM POWDER:

Agrigold Neem powder is a natural biopesticide as well as the supplier of the NPK content to the plant in an organic way, proving to be an effective organic manure. It combats the damages caused by the chemical insecticides. It also protects fishponds from fungal diseases, and acts as constraints for the growth of moss. Suitable for all types of highly prone infectious agricultural plants such as vegetables, potted plants and low shelf-life fruit plants.

Available packing: 1 kg pouch, 40 kg HDPE.

AGRIGOLD NEEMBOON:

Agrigold has come up with an innovative bioformulation. **Neem Boon**, an herbal-based natural fertilizer with multiples of characters containing best medicinal and pesticidal properties. It enriches the soil and keeps soil alive and productive. As it contains special herbs, it acts as multivitalizer to the plant supplying all the micronutrients. It is suitable for gardens, horticultural, lawns, and herbal plants etc. It also acts as a source of nitrogen, phosphorus and potassium.

Available packing: 500 Gms, 1 kg, 40 kg HDPE.

AGRIGOLD MITHRA (BIO FERTILISERS):

Agrigold Mithra Biofertilisers are living microbial inoculants which are able to fix atmospheric nitrogen or solubilise phosphorous, decompose organic material. On application, it enhances the growth of plant, increases the yield, also improves soil fertility and reduces pollution. Agrigold Mithra Biofertilisers are very useful eco friendly approach in sustainable farming.

Agrigold Mithra Biofertilisers are available in carrier and liquid form.

- Agrigold Phosphobacteria (Phosphate solubilising bacteria): It solubilises the phosphates present in the soil and makes it available to the plants in most useful way. It can be applied to all type of crops, plants and soils.
- Agrigold Azospirillum (Nitrogenfixingbacteria): It fixes the atmospheric nitrogen in symbiotic association. It can be applied to sugarcane, paddy, fodder crops etc.
- Agrigold Azotobacter (Nitrogen fixing bacteria): It fixes atmospheric nitrogen in asymbiotic association. It can be applied to all plantation crops.
- Agrigold Rhizobium (Nitrogen fixing bacteria): It fixes atmospheric nitrogen in asymbiotic association. It can be applied to all leguminous crops.

Available packing: 500ml, 1 lit & 1 kg.

AGRIGOLD BIOPESTICIDES:

Agrigold Biopesticides are very powerful biopesticides developed biotechnologically through integrated pest and vector management, totally pesticides and chemical residue free biocontrol agents, working in harmony with nature.

AGRIGOLD TRICHOGOLD contains cells of *Trichoderma viridae*, antagonistic free living fungal biopesticide. By virtue of the quick growth and multiplication, it suppresses the pathogenic fungi and protects plant from diseases. Highly active on root and stem rot caused by *Phytophthora*, *Sclerotinia*, *Rhizoctonia* wilts caused by *Fusarium* and *Verticillium*, blights/leaf spots caused by *Alternaria*, *Ascohyta*, *Cercospora*, *Macrophomina*, *Mycothecium*, *Ramularia*, Downy mildews and Powdery mildews, white rust and smuts fungal diseases of cotton, pulses, vegetables, oilseeds, fruit plants and floriculture.

Available packing: 250gm, 500gm & 1 kg

AGRIGOLD MAHAMONAS: is also powerful antagonistic bacterial formulation containing *Pseudomonas fluorescens*, which grows and multiplies on organic matter and produces a number of hormones, which promotes plant growth and vigor. Agrigold Mahamonas also produces various types of substances which are antibiotic in nature and are helpful in protecting the plants from various diseases. Agrigold Mahamonas is very effective against blast disease on paddy, highly effective on quick wilt disease, damping off, blight / leaf spots etc disease caused by pathogenic bacteria. It controls bacterial and fungal diseases on spices, cereals, pulses, vegetables, oil seeds and fruit plants.

Available packing: 250gm 500gms & 1kg

AGRIGOLD SPYDER (Contact Insecticide): Agrigold Spyder is based on botanical extracts and modified natural oils. This product may be used to control targeted pests on crops which include vegetables, grapes, cotton and other crops. Upon spraying this contact formula, the insects lay weak and do not feed on further due to its antifeedant properties.

Available packing: 250ml & 500ml

AGRIGOLD ECOMITE (Contact Miticide): It is an effective alternative to other synthetic contact pesticide. This formulation is primarily based on alkaloids, salts of fatty acids and natural oils. This can be used to control mites effectively on vegetables, flowers and other crops and can also be used until harvest.

Available packing: 250ml & 500ml

AGRIGOLD PROTECTOR (Contact Fungicide): Agrigold Protector contains a complex of alkaloids which blocks the metabolic functions of pathogens, thereby rendering them lifeless. The surface active agents help the spray remain active for longer time. Apart from above, the growth promoting substances works as a tonic rejuvenating the effected plants instantly to a healthy and productive state. It acts as preventive as well as curative agent. It can be used against leaf spot, blast, bacterial leaf blight etc.

Available packing: 500gm

AGRIGOLD PLANT GROWTH PROMOTERS:

These are the possible organic inputs, ecofriendly, and result oriented advanced formulations, employing a blend of Indian traditional knowledge and new modern manufacturing methods. These plant growth promoters are derived organically to protect the plants from the diseases and pests without the use of harmful synthetic substances.

AGRIGOLD BIORAAM (Marine Protein based – Premium): This product is a combination of high quality protein, chelated B vitamins and nutrients from rare herbs. This product is a unique and energy packed one that can enhance the growth uniformly resulting in higher crop output. It promotes cell division and cell elongation, protein synthesis, root initiation and development. It also improves yield and shelf life of output. It mainly helps growth retarded plants to spring into its full potency and yielding level.

Available packing: 500gm, 250ml & 500ml

AGRIGOLD BIOVIC (Nitrobenzene – 20%): Agrigold Biovic is a research-based product containing 20% nitrobenzene with naturally available vegetable protein. Agrigold Biovic is a plant energizer, flowering stimulant and yield boosters. It enhances the plant canopy and induces profused flowering and thereby increases the yield.

Available packing: 250ml, 500ml & 1 lit

MICRONUTRIENTS:

Micronutrients are elements, which are essential for plant growth but are required in much smaller amounts than those of the primary nutrients. If the plant or the crop are deficient in any of the micronutrients, than there is visible change in the color of the leaf, growth of the crop/plant, and the yield of the crop and plants. Micronutrients are made available to the farmers as straight micronutrients in Agrigold Brand as **Agrigold Swarna** and **Formulated** ones as Agrigold Fertomix.

AGRIGOLD SWARNA are the straight micronutrients available in different packaging as per the requirement and deficiency in the crop and soil. They are used for effective correction of individual micronutrient deficiencies on all crops.

The different products of Agrigold Swarna:

Agrigold Swarna Zinc 33%, Agrigold Swarna Zinc Sulphate 21%, Agrigold Swarna Zinc 12%, Agrigold Swarna Boron 10.5%, Agrigold Swarna Borax, Agrigold Swarna Boron 17%, Agrigold Swarna Iron 12%, Agrigold Swarna Iron 19%, Agrigold Swarna Mn 30.5%, Agrigold Swarna Mg 9.6 %, Agrigold Swarna Copper 20%, Agrigold Swarna Boron 20%, Agrigold Swarna Molybdenum 52%

Available packaging: 100 g, 250gm, 500gm & 1kg

Agrigold Fertomix is formulated micronutrients providing the plant and soil, different micronutrients at a time. Agrigold Fertomix is rich and well-balanced micronutrient plant food. Agrigold Fertomix is excellent and ideally enriched foliar micronutrient, correcting micronutrient deficiencies immediately through foliar absorption. It also helps plants in absorbing nitrogen and other primary elements. **Agrigold Fertomix is manufactured state specifically as per the formulation set by the individual State Gov. Agricultural Scientists.**

Available packaging: 500gm, 1kg, Formula (7) soil application:-5kg, 10kg & 25 kg.

Agrigold Mahanutrin (100% Imported Water-soluble fertilizers).

Agrigold Mahanutrin 100% water soluble fertilizers are the fertigation products, free flowing, free crystalline powder, which dissolves speedily and completely in water. They contain Nitrogen, Potassium and Phosphorous in different forms, which are needed optimally at different growth stages of crops. Each product of Mahanutrin is designed so as to provide the desired element in easily available form during irrigation leading to fertigation, one of the recent advantages in horticulture.

ALL NPKs: - (19:19:19, 17:17:17, 20:20:20, 18:18:18, 06:12:36, 13:40:10): Agrigold mahanutrin all NPKs is a free flowing crystalline powder fertilizer and a unique blend of macro & micro nutrients, further its NPK Ratio ensures healthy vegetarian growth. Agrigold Mahanutrin all NPKs are free from chlorine compounds, sodium and heavy metals for preventing the deficiencies and salt accumulations.

Mono Ammonium Phosphate (MAP- 12:61:00): Agrigold Mahanutrin mono ammonium phosphate is a free flowing crystalline powder fertilizer, which dissolves completely in water. It is a water-soluble fertilizer containing the highest phosphorous content available. It keeps P^H effectively stable around 4.5 through buffering fertigation solutions. Agrigold Mahanutrin MAP is having N as ammonia and offers better control for N availability.

Mono Potassium Phosphate (MKP- 00:52:34): Agrigold Mahanutrin Mono Potassium phosphate is a free flowing crystalline powder fertilizer, which dissolves completely in water. It is the most concentrated water-soluble fertilizer containing both phosphorous and potassium nutrients. It is best used for intensive products in Horticulture & Floriculture. Agrigold Mahanutrin MKP has significant controlling effects on fungal diseases.

Potassium Nitrate (13: 00: 45): Agrigold Mahanutrin potassium nitrate is a free flowing crystalline powder fertilizer, which dissolves completely in water containing potassium and nitrogen. It ensures uniform fruit development, fruit size, color, sugar content and flavor. It enhances the uptake of other nutrients like Ca, Mg and K.

Potassium Sulphate (SOP- 00:00:50:18): Agrigold Mahanutrin potassium sulphate ensures high quality, size, color and yield. It is free from harmful nutrients like chlorine and sodium and has a P^H of 3.2 which helps to lower the P^H at root surface, which improves availability of P, Fe and other micronutrients. Its high solubility provides quickly available potash along with sulphur.

Calcium nitrate: Agrigold Mahanutrin Calcium Nitrate is a free flowing crystalline powder fertilizer, which dissolves completely in water containing Ca and N. It ensures cell wall strength, better quality and shelf life. It prevents fruit cracking, rotting and spots on fruits. It helps in the uptake of K, Ca and Mg.

Available packing: 1 kg & 25 kg

Agrigold Sprayers: Agrigold Sprayers are imported, most efficient, economical, portable and light in weight, easy to handle, with trigger lock and fully adjustable nozzle system. Agrigold Sprayers work with constant pressure up to 3 min. Total 5 variant types of nozzles.

Available packing: 1 lit, 1.5 Lit, 2lit, 3lit, 5 lit, 8 lit, 16lit.
